

Theodor Landell

SECONDARY ENGINEER

PROFILE

Newly graduated Secondary Engineer (Swedish TE4) specialising in fullstack development and AI, with a focus on frontend. I build clean, responsive interfaces in React and enjoy taking a project all the way from idea to finished product. Hands-on experience building real systems — from web apps with real-time data to computer vision. Curious, persistent and comfortable in a team, with years of experience leading and making decisions under pressure as a football referee.

TECHNICAL SKILLS

Frontend	React, JavaScript (ES6+), HTML, CSS, Tailwind CSS, Vite
Backend	Python, FastAPI, Node.js, REST & WebSocket
AI & computer vision	YOLOv8, OpenCV
Tools	Git & GitHub, Claude Code, Claude API, Google Colab

PROJECTS

DartVision — automatic dart scoring system

2025–26

React, Vite, Tailwind · FastAPI, Python · YOLO · WebSocket

Full-stack product where two cameras and a YOLO model read the darts and score in real time. Login, multiple game modes, tournaments, training modes, a live board and saved statistics with a heatmap.

Blackjack — camera-based card recognition

Final thesis project, 2026

YOLOv8 · OpenCV · Python · JavaScript

A web app that plays blackjack against a real deck. A YOLOv8 model recognises each card's rank and suit, computes the hand value automatically and runs a complete game with deals, bets and a balance.

Defect Planks — automated quality control

Videonet, 2026

Python · FastAPI · YOLOv8 · OpenCV · MJPEG

Inspection system that detects cracks and corner defects in wooden planks in real time using computer vision. Web app with live streaming, statistics and support for RTSP industrial cameras.

EXPERIENCE

AI Project Lead — Alamanco

Nov 2025–present

Introducing AI tools at a consulting company in the welfare sector. Designing AI workflows and training both staff and clients.

Intern — Videonet Sweden AB

Feb–May 2026

Built an automated plank quality-control system from scratch — from model training in Google Colab to a web app with real-time streaming, statistics and RTSP camera support.

Football Referee — Stockholm FA (StFF)

May 2018–present

Officiating matches up to P17 Allsvenskan level. Leading matches, making quick decisions under pressure and communicating with players and coaches. Also works in referee teams as head and assistant referee.

- Event Crew — Superior Challenge (MMA event)**

2023 & 2025

Responsible for fighters and coordinating with the TV team. In 2025 I also trained and led two new crew members during a live production.
- Team Member — ICA Maxi, Nynäshamn**

Jun–Aug 2024

Goods handling and customer service, with careful date checks.
- Team Member — McDonald's**

May 2023–May 2024

Register and customer service at high pace; learned to handle stress without losing quality.
- Daily Activities Unit — Haninge Municipality**

Jun–Jul 2022

Archiving and deliveries; developed my own routines to streamline the work.

EDUCATION

- Secondary Engineer (TE4), Fullstack & AI — Östra Gymnasiet, Huddinge**

Aug 2025–May 2026

One-year post-secondary programme in partnership with KTH and IT companies. Backend & frontend development, data storage, software design, data structures & algorithms. Includes a workplace internship.
- Technology Programme — Östra Gymnasiet**

graduated 2025
- Floorball Coach Certification (basic + goalkeeper, Red level)**

2023

CERTIFICATIONS

- Building with the Claude API — Anthropic (May 2026)
- Introduction to Model Context Protocol — Anthropic (Apr 2026)
- Claude Code in Action — Anthropic (Apr 2026)
- Introduction to Agent Skills — Anthropic (Mar 2026)

LANGUAGES

- Swedish — native
- English — fluent (professional)

ADDITIONAL

- Driving licence: Manual B
